INDEX TO VOLUME XX

Aerobic form of bacteria, The effect of the oxidation-reduction character of the medium on the growth of an 417
Albino rat, Etiology of spontaneous pulmonary disease in the 361
Allyn, W. P., and Baldwin, I. L. The effect of the oxidation-reduction character of the medium on the growth of an aerobic form of bacteria 417
Anaerobic coccus, *Micrococcus niger*, a new pigment-forming, recovered from urine in a case of general arteriosclerosis 407
Anderson, Lucile Russell. Peroxidase in relation to bacterial growth with special reference to the influenza bacillus 371
Arteriosclerosis, *Micrococcus niger*, a new pigment-forming anaerobic coccus recovered from urine in a case of general 407

B. diphtheriae, Protobacterial forms of 25
B. Welchii, The influence of H-ion concentration on the sporulation of 85
Bacillus necrophorus, A study of, obtained from cows 343
Bacillus prodigiosus, Rennin production by 297
Bacteria, The effect of the oxidation-reduction character of the medium on the growth of an aerobic form of 417
——, The growth of, in a continuous flow of broth 127
Bacterial flagella and capsules, A method of staining, together with a study of the origin of flagella 203
—— growth, Peroxidase in relation to, with special reference to the influenza bacillus 371
—— organisms, The bacteriophage content of sewage and its action upon 151
—— proteases, Studies in. I. The relation of protease production to the culture medium 41
—— spoilage of a Thousand Island dressing 99
—— spore germination in relation to environment, Bacterial spores. II 313
—— spores. I. A study in heat resistance and dormancy 299
—— spores. II. A study of bacterial spore germination in relation to environment 313
—— survival, Factors which influence tests of. I. The effect of varying periods of incubation of the survival test culture 161
—— ——, Factors which influence tests of. II. The effect of the pH of the survival test culture on results obtained with a saprophytic tubercle bacillus 175
Bacteriological examination of water, A system for the 381
——, The, content of sewage and its action upon bacterial organisms 151
Bacteriophagy, The, of a spore-forming organism 15
Baldwin, I. L., and Allyn, W. P. The effect of the oxidation-reduction character of the medium on the growth of an aerobic form of bacteria 417

Beckwith, T. D., and Rose, Edythe J. The bacteriophage content of sewage and it action upon bacterial organisms 151
Bethune, Norman, Smith, David T., and Wilson, J. L. Etiology of spontaneous pulmonary disease in the albino rat 361
Broth, The growth of bacteria in a continuous flow of 127
Brown, J. W., and Skinner, C. E. Is the Eijkman test an aid in the detection of fecal pollution of water? 139

Carbohydrate metabolism of organisms of the genus Mycobacterium 235
Clark, Paul F., Schindler, John, and Roberts, David J. Some properties of poliomyelitis virus 213
Comparative, A, study of members of the Lactobacillus genus, with special emphasis on lactobacilli of soil and grain 61
Cowles, Philip B. The bacteriophagy of a spore-forming organism 15
Cows, A study of *Bacillus necrophorus* obtained from 343

Diphtheria bacillus, A study on the dissociation of the 107
Dormancy, Heat resistance and. A study in. Bacterial spores. I 299
Dysentery, Sonne. A report of 32 cases of dysentery caused by *Eberthella paradysenteriae* Sonne 183

Eberthella paradysenteriae Sonne, Sonne dysentery. A report of 32 cases of dysentery caused by 183
Effect, The, of the oxidation-reduction character of the medium on the growth of an aerobic form of bacteria 417
Eijkman test, Is the, an aid in the detection of fecal pollution of water? ... 139
Etiology of spontaneous pulmonary disease in the albino rat 361

Factors which influence tests of bacterial survival. I. The effect of varying periods of incubation of the survival test culture 161
—— —— —— —— —— —— ——. II. The effect of the pH of the survival test culture on results obtained with a saprophytic tubercle bacillus ... 175
Fecal pollution of water, Is the Eijkman test an aid in the detection of? ... 139
Flagella, A method of staining bacterial flagella and capsules together with a study of the origin of 203

Gorini, C. Rennin production by *Bacillus prodigiosus* 297
Gram compound, The nature of the, and its bearing on the mechanism of staining 287
Growth, The, of bacteria in a continuous flow of broth 127

Hall, Ivan C. *Micrococcus niger*, a new pigment-forming anaerobic coccus recovered from urine in a case of general arteriosclerosis 407
Heat resistance and dormancy, A study in. Bacterial spores. I 299
H-ion concentration, The influence of, on the sporulation of *B. Welchii* 85
Hunt, George A., and Rettger, Leo F. A comparative study of members of the Lactobacillus genus with special emphasis on lactobacilli of soil and grain 61

Improved, An, technic for the Voges-Proskauer test..... 121
Influence, The, of H-ion concentration on the sporulation of *B. Welchii*.... 85
Influenza bacillus, Peroxidase in relation to bacterial growth with special reference to the..... 371
Is the Eijkman test an aid in the detection of fecal pollution of water?.... 139
Isaacs, M. L. Factors which influence tests of bacterial survival. I. The effect of varying periods of incubation of the survival test culture..... 161
——. —— —— —— —— —— —— ——. II. The effect of the pH of the survival test culture on results obtained with a saprophytic tubercle bacillus..... 175

Jordan, Elizabeth F., and Smith, George H. Protobacterial forms of *B. diphtheriae*..... 25

Kahn, Morton C., Torrey, John C., and Salinger, May H. The influence of H-ion concentration on the sporulation of *B. Welchii*..... 85

Lactobacillus genus, A comparative study of members of the, with special emphasis on lactobacilli of soil and grain..... 61
Leifson, Einar. A method of staining bacterial flagella and capsules together with a study of the origin of flagella..... 203

Merrill, Malcolm H. Carbohydrate metabolism of organisms of the genus Mycobacterium..... 235
Method, A, of staining bacterial flagella and capsules together with a study of the origin of flagella..... 203
Micrococcus niger, a new pigment-forming anaerobic coccus recovered from urine in a case of general arteriosclerosis..... 407
Morrison, Edward W., and Rettger, Leo F. Bacterial spores. I. A study in heat resistance and dormancy..... 299
—— and ——. ——. II. A study of bacterial spore germination in relation to environment..... 313
Mycobacterium, Carbohydrate metabolism of organisms of the genus..... 235

Nature, The, of the Gram compound and its bearing on the mechanism of staining..... 287
Nelson, Richard L. Sonne dysentery. A report of 32 cases of dysentery caused by *Eberthella paradysenteriae* Sonne..... 183

Orcutt, Marion L. A study of *Bacillus necrophorus* obtained from cows... 343
Oxidation-reduction character of the medium on the growth of an aerobic form of bacteria, The effect of the..... 417

Pasteurella boviseptica, A simple mineral mixture agar for the cultivation of..... 9
Pederson, Carl S. Bacterial spoilage of a Thousand Island dressing..... 99
Peroxidase in relation to bacterial growth with special reference to the influenza bacillus..... 371

pH, The effect of the, of the survival test culture on results obtained with a saprophytic tubercle bacillus. Factors which influence tests of bacterial survival. II 175
Pneumococcus type II, A variant obtained directly from 1
Poliomyelitis virus, Some properties of 213
Protease production, The relation of, to the culture medium. Studies in bacterial proteases. I 41
Protobacterial forms of *B. diphtheriae* 25
Pulmonary disease, Etiology of spontaneous, in the albino rat 361

Rakieten, Morris L. A variant obtained directly from pneumococcus type II 1
Rennin production by *Bacillus prodigiosus* 297
Rettger, Leo F., and Hunt, George A. A comparative study of members of the Lactobacillus genus, with special emphasis on lactobacilli of soil and grain 61
—— and Morrison, Edward W. Bacterial spores. I. A study in heat resistance and dormancy 299
—— and ——. ——. II. A study of bacterial spore germination in relation to environment 313
Roberts, David J., Clark, Paul F., and Schindler, John. Some properties of poliomyelitis virus 213
Rogers, L. A. and Whittier, E. O. The growth of bacteria in a continuous flow of broth 127
Rose, Edythe J., and Beckwith, T. D. The bacteriophage content of sewage and its action upon bacterial organisms 151

Salinger, May H., Torrey, John C., and Kahn, Morton C. The influence of H-ion concentration on the sporulation of *B. Welchii* 85
Salle, A. J. A system for the bacteriological examination of water 381
Saprophytic tubercle bacillus, The effect of the pH of the survival test culture on results obtained with a. Factors which influence tests of bacterial survival. II 175
Schindler, John, Clark, Paul F., and Roberts, David J. Some properties of poliomyelitis virus 213
Scott, Joseph P. A simple mineral mixture agar for the cultivation of *Pasteurella boviseptica* 9
Sewage, The bacteriophage content of, and its action upon bacterial organisms 151
Simple, A, mineral mixture agar for the cultivation of *Pasteurella boviseptica*. 9
Skinner, C. E., and Brown, J. W. Is the Eijkman test an aid in the detection of fecal pollution of water? 139
Smith, David T., Bethune, Norman, and Wilson, J. L. Etiology of spontaneous pulmonary disease in the albino rat 361
Smith, George H., and Jordan, Elizabeth F. Protobacterial forms of *B. diphtheriae* 25
Soil and grain, A comparative study of members of the Lactobacillus genus, with special emphasis on lactobacilli of 61

Some properties of poliomyelitis virus 213
Sonne dysentery. A report of 32 cases of dysentery caused by *Eberthella paradysenteriae* Sonne 183
Spore-forming organism. The bacteriophagy of a 15
Staining, The nature of the Gram compound and its bearing on the mechanism of 287
Stearn, Allen E., and Stearn, Esther Wagner. The nature of the Gram compound and its bearing on the mechanism of staining 287
Stearn, Esther Wagner, and Stearn, Allen E. The nature of the Gram compound and its bearing on the mechanism of staining 287
Studies in bacterial proteases. I. The relation of protease production to the culture medium 41
Study, A, of *Bacillus necrophorus* obtained from cows 343
——, ——, on the dissociation of the diphtheria bacillus 107
Survival test culture, The effect of the pH of the, on results obtained with a saprophytic tubercle bacillus. Factors which influence tests of bacterial survival. II 175
—— —— ——, The effect of varying periods of incubation of the. Factors which influence tests of bacterial survival. I 161
System, A, for the bacteriological examination of water 381

Thousand Island dressing, Bacterial spoilage of 96
Torrey, John C., Kahn, Morton C., and Salinger, May H. The influence of H-ion concentration on the sporulation of *B. Welchii* 85

Urine, *Micrococcus niger*, a new pigment-forming anaerobic coccus recovered from, in a case of general arteriosclerosis 407

Variant, A, obtained directly from pneumococcus type II 1
Voges-Proskauer test, An improved technic for the 121

Water, A system for the bacteriological examination of 381
——, Is the Eijkman test an aid in the detection of fecal pollution of? 139
Werkman, C. H. An improved technic for the Voges-Proskauer test 121
Whittier, E. O., and Rogers, L. A. The growth of bacteria in a continuous flow of broth 127
Wilson, Elizabeth D. Studies in bacterial proteases. I. The relation of protease production to the culture medium 41
Wilson, J. L., Smith, David T., and Bethune, Norman. Etiology of spontaneous pulmonary disease in the albino rat 361

Yü, H. A study on the dissociation of the diphtheria bacillus 107
